Diamond and Related Materials 7 (1998) 1747-1768

**DIAMOND  
AND  
RELATED  
MATERIALS**

## Subject Index for Volume 7

- a-C:H**  
Electron field emission studies from amorphous carbon thin films, 645  
An investigation of the role of hydrogen in ion beam deposited a-C:H, 908
- a-C:H films**  
Investigation of hydrogenated amorphous carbon (a-C:H) films produced by ArF (193 nm) laser ablation of poly(methyl methacrylate), 699  
Improved high-temperature stability of Si incorporated a-C:H films, 1155  
The wettability of a-C:H films by solution of different physicochemical compositions, 1263
- a-C:H optoelectronic properties**  
Comparative study of the optical and structural properties of a-C:H films deposited by conventional diode and microwave ECR assisted rf plasma methods, 486
- Ablation rate**  
Ablation of CVD diamond with nanosecond laser pulses of UV-IR range, 1623
- Absorption**  
Diamond-coated glass substrates, 1639
- Acetylene**  
Molecular dynamics studies of a-C:H film growth by energetic hydrocarbon molecule impact, 858  
Systematic study of diamond film deposition in an atmospheric-pressure stagnation-flow flame reactor, 1320
- Acoustic wave devices**  
Polycrystalline diamond films for acoustic wave devices, 533
- Adhesion**  
Diamond coating on steel with a titanium interlayer, 603  
Adherence experiments on cBN films, 853  
High adhesion and quality diamond films on steel substrate, 903  
Analyses of the Si-C bond in the interface between diamond-like carbon film and silicon wafer, 1308  
Characterization of carbon and zirconia films deposited on polycarbonate for scratch-proof coating applications, 1394  
Improvement in adhesion of diamond films on cemented WC substrate with Ti-Si interlayers, 1628  
Adhesion properties of CVD diamond film on binder-less sintered tungsten carbide prepared by the spark sintering process, 1669
- Adhesion improvement**  
Adhesion improvement of diamond films on molybdenum rod substrates using metallic powder, 1351
- Adsorption**  
Deuterium adsorption-desorption from diamond (100) single crystal surfaces studied by TPD, 170
